We believe that depriving children of clean, safe water is not humane, because hydration is particularly important for **children** as they are at a greater risk of getting dehydrated. By protecting and restoring spring waters in the Aeta villages will satisfy the very basic needs of the Aeta people. We aim to improve health and create a new economy without compromising the ability of future generations to meet their needs.

Please consider coming to help us build water cement tanks in six Aeta villages that will save 1200 Aeta families and benefit approximately 6,000 people. Our goal is to raise \$30,000 and this equates to saving the lives of 6,000 at a cost of \$5 per person.

Donations are welcome at www.aetatribes.org and/or www.abcsglobalhealth.org.
